

# IRMA : INFRARED VISIBILITY FORECAST

- ✓ Enhanced mission planning
- ✓ Effective sensor coverage
- ✓ Threat mitigation
- ✓ Hours of assets spared

**Combines  
all relevant  
obscurants**

**The best of climate science for defence**

Global coverage

Quick calculation

Self-explanatory at first glance

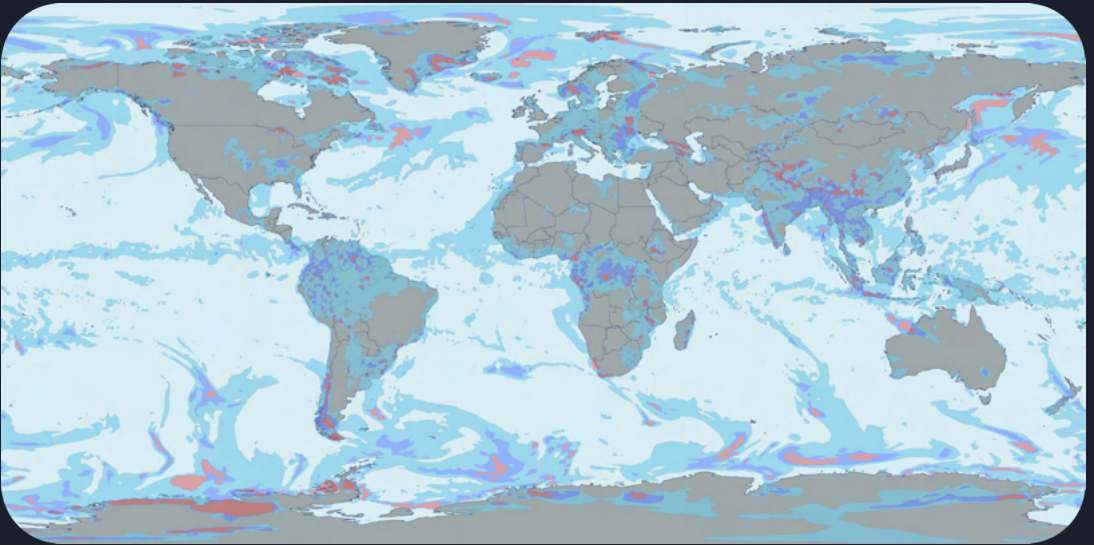

Designed and produced in-house

© 2025 Pair Work SAS

- ✓ IRMA predicts infrared visibility in the lower layer of the atmosphere. The software helps operators plan and optimize infrared sensors coverage and threat mitigation.
- ✓ IRMA leverages on years of research in meteorology and oceanography and uses open-access weather forecasts to anticipate aerosols and molecular concentrations.
- ✓ IRMA is as user-friendly as your favorite weather forecast website.

- ✓ IRMA saves hours of aerial assets, both manned and unmanned.
- ✓ No export license.
- ✓ IRMA comes as a web app, an API or on premise.
